EXPERIENCIE

2022 - Present **Freelance Software Engineer & Educator** Oax, Mex.

SELF EMPLOYED @ [HTTPS://DEXUL.ME/](https://DEXUL.ME/)

Offering expertise in Software Engineering, providing a spectrum of services including:

- Software Development
- Project Management
- Web Development

Additionally, actively involved in educating students on diverse subjects such as Software/Web Development, Algebra and English.

2024 - 2025 **Back-end Developer & Mobile Backend Developer** Oax, Mex.

UNILLANTAS DE OAXACA S.A DE C.V

In this role, I was in charge of designing, developing, and maintaining internal systems for HR management, operational workflows, and enterprise processes. I worked with technologies such as **Laravel, PHP, JavaScript, MySQL, Vue.js, and TailwindCSS**, using **Laravel's native ORM** for seamless database integration. I developed and integrated **RESTful APIs**, optimized queries, and improved system performance by up to 90%. I also automated notifications via **Telegram bots** using custom API integrations. I also implemented **Pusher-integrated notifications** for real-time updates. I developed a web-based survey system fully integrated with the core HRMS backend.

I built the mobile version of the Human Resources Management System (HRMS) using **Flutter** and **Dart**. I also designed the **communication architecture to ensure consistency and high performance on mobile devices**. Keeping the **notifications compatibility and document generations**.

SKILLS

PHP (Laravel 10, 11, 12), Java, C# (.NET Core, .NET Framework), JavaScript, CSS, HTML, C/C++, Dart (Flutter), MySQL, PostgreSQL, MongoDB, SQLite, SQL, Vue.js, TailwindCSS, Flutter, Docker, Git, AWS Lambda, AWS EC2, Stripe API, Linux servers
